EXECUTIVE SUMMARY

This report contains the main scientific output of the Amsterdam Business School (ABS) for the year 2019, as well as forthcoming refereed articles 2020 (as collected in December 2018-February 2019). This information, included in part B, is preceded by key tables on input and output in these same years, in comparison to previous years, as well as a short summary of the research institute's history and strategy, and assessment in part A. 2018 has seen a further growth in faculty across most sections, notably in the tenure track. All output connected to ethics and sustainability (one of our focal areas) is shown in gold-green.

Further details about the institute, our researchers and activities is available on our website (see http://abs.uva.nl/research; http://abs.uva.nl/sections-faculty).

PART A. BACKGROUND AND KEY FIGURES

1.1 Background, strategy and research management

ABS is the business school of the Faculty of Economics & Business of the University of Amsterdam (UvA Economics & Business). Our strategy is to conduct and publish internationally recognised research across a broad range of business disciplines. Research is vital to the school and the university and an integral part of the ABS mission to offer an inspiring international learning community to study business and management, where both staff and students can develop their capacities to optimum effect. ABS aims to foster 'independent minds' with an impact on international business and society at large by conducting high-quality academic research on innovative and socially relevant themes, and by offering research-based teaching that meets the highest international standards.

We are committed to advancing the understanding of business and its role in society and seek to make research results available to and inform practitioners and wider audiences. The aim to provide research-based teaching does not require that all staff are renowned researchers or that all teaching modules are solely based on research. It does, however, require that students are exposed to relevant academic research in their programmes, and that there are areas of excellence receiving specific attention. For example, ABS has since long traditionally paid specific attention to corporate governance, broadly defined, from an interdisciplinary business perspective. This embraces examinations and theorisations of the processes of governance at all organisational levels, addresses management practices and leadership roles, highlights their impact on corporate financial and non-financial performance, and examines institutional and behavioural drivers. Another key theme is sustainability and business ethics. More recent interdisciplinary foci that we are developing within the school include entrepreneurship and digital business, data science and business analytics

The Amsterdam Business School Research Institute (ABS-RI) was created in 2002 to further academic research (i.e. aimed at output in internationally respected journals), as this was then lacking; targeted attention based on specific knowledge of the business field was seen as essential for this purpose. Whilst the finance group and a few individuals in other areas of the school already had an international research and publication record at the time, significant steps were taken in other areas. The main component of our strategy to improve research quality and output in international refereed journals was straightforward: the recruitment (and retention) of high-quality, full-time academics with developed research capacities, also, specifically, in areas of research other than finance. This was coupled with a more consistent policy with respect to part-timers' research contribution, the reclassification of non-researchers as teachers and the development of the research capability of existing staff. Our faculty is key for realising our strategy, and we seek to attract and retain high-quality scholars by providing an attractive working environment for ambitious research-oriented faculty. ABS seeks to offer good employment conditions (a fair salary, good expenses, leave, computers, office space, secretariat, good management) and an excellent academic working environment (regular seminars and visitors, good colleagues, an internationally oriented, inspiring and supportive climate, tenure and promotion opportunities).

Figure 1 ABS Vision, mission, values and strategy

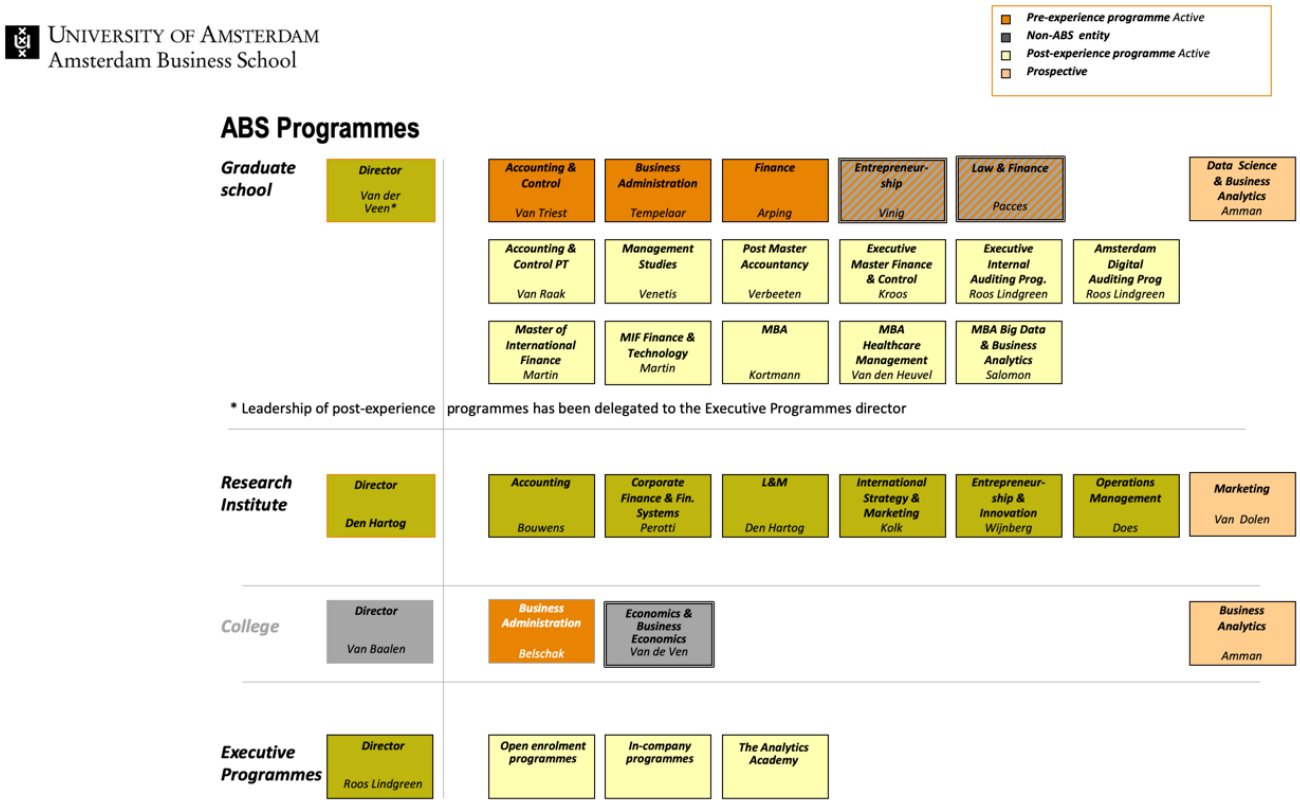

The ambition to develop high-quality and relevant academic research has been central to ABS from the beginning and is widely shared across the school. It is supported by a system which allocates research time on the basis of past publication success in high-quality international journals, with those meeting the ABS-RI criteria (for details, see http://abs.uva.nl/research/research-policy/research-policy.html) earning 50% research time (the other 50% is dedicated to teaching, including thesis supervision and coordination activities). Research and teaching are intertwined as the school focuses on research based teaching. Management duties, if substantial, are deducted from staff members' teaching time. We encourage faculty to attend and present papers at international conferences and participate in our internal seminar and paper development series as well as the methods workshops offered. We provide individual research accounts to enable faculty members to attend international conferences and/or to purchase specialised literature, small datasets, software and/or hardware, take courses or hire a research assistant or pay subjects (and lab costs) in experimental studies. Additional funding is available for specific cases via the budgets of the academic sections and/or ABS-RI, which also pay for subscriptions for the large databases. Since 2017 ABS has its own fully functional research laboratory for behavioural research.

1.2 Input

ABS is organised as a matrix. Figure 2 presents the current organigram of the school as a whole, showing the 'policy- or demand side' of the matrix (the programmes and institutes), whereas table 1 gives an overview of the research time within the academic sections (the supply side) in full-time equivalent (fte). It is categorized per year and per academic section, and within that, per staff category. Since 2014, ABS has six academic sections (in preceding years, there were four). In 2020 the Marketing group has a section of its own. Sections are capacity units responsible for sub disciplinary teaching and for all personnel matters of the concomitant faculty and PhD students (salaried junior employees in the Dutch system).

Figure 2 Organigram Amsterdam Business School

It should be noted that there are some additional ABS researchers not included in the tables as they do not have a formal appointment at our university (or only a 0.0 fte arrangement, and thus they are not visible in the tables). They include so-called external PhD students, usually practitioners with several years of experience who pursue their research alongside jobs in business, governmental or non-governmental organisations, or (applied) research or teaching institutions. Until recently, we had only a small number of successful external PhD students, but the past few years have seen an increased interest in starting such trajectories, partly as a result of intensified efforts for external grant income, which led to various forms of co-funding. Furthermore, there are also five professors affiliated to us at no cost as they are on the payroll of firms, international organisations or research institutions other than ABS or here by special appointment (Osseyran, OM (SurfSara), Claessens (FIN, IMF), Van Schayk (ACC, Deloitte), Van Gool (FIN), Van den Heuvel (OM)).

Tables 1 – 3 show the strong increase in the number of researchers in the previous years, as well as continued diversity in terms of gender and nationality.

Table 3.2 Faculty: internationalisation

Internationalisation	2019
# Different nationalities	32
Dutch	86
%	51%
Non-Dutch	82
%	49%

The tables above show that research fte have increased considerably in the past few years. Overall most of the fte growth took place at the junior level (see Table 1), leading to a relative decline in the junior-senior faculty ratio. We have also been able to attract quite some non-Dutch researchers from a variety of countries. By the end of 2019, 49% of our research staff was non-Dutch, representing 32 foreign nationalities (see Tables 3.1 and 3.2). All researchers, including the Dutch, have an international orientation, as they engage in international conversations, attend international conferences, collaborate with international colleagues and co-authors, and obviously publish in international journals (see below). While recruiting high-quality faculty within the limits set by the Dutch salary system is not easy, continuous attention, patience and concerted efforts over a longer period of time do pay off. Locational advantages certainly play a role, but this is reinforced by the ambition and good atmosphere within a relatively young business school, and the support that we seek to offer. Although it is inevitable that some researchers leave ABS for a variety of reasons (personal, professional, financial), we hope they will continue to be 'ambassadors' in the sense of appreciating their time at the school.

1.3 Output

The tables 4 and 5 give an overview of the output in 2019, focused on refereed journal articles and dissertations. It shows a stable output in terms of refereed journal articles in total, as well as a clear growth in the number of international refereed publications in the top A* category. Table 7 shows a strong presence in the editorial boards of international journals and table 11 gives an overview of seminars organised at ABS in 2019, showing the active research culture at the school. Similar to the overall development in research fte over the years, where we see that large steps have been taken to develop non-finance areas, the key output underlines the same broadening, with a large share of the A and B articles in management and, to a lesser extent, marketing outlets. The broadening of our research over the years is becoming visible in sub disciplinary assessments. A bibliometric exploration of our university's research output registration, commissioned to the Centre for Science and Technology Studies (CWTS), which became available in June 2015, considered performance in Web of Science subject categories. It measured a Pptop10 indicator of 27% for management, 26% for business and 12% for business-finance, meaning that the actual number of top 10% publications is respectively 2.7, 2.6 and 1.2 times higher than could be expected based on the field and publication year. For our Corporate Governance focal research area, Pptop10 was also 27%.

Part B gives a detailed listing of all journal publications and allows for a more in-depth insight of specific topics, authors and main ABS researchers involved, as well as grant applications, honours and awards. This is just part of the many activities undertaken by our faculty, of which some are less visible in direct output. A clear example is editorial activity of journals, i.e. associate/senior editorships and board memberships, which is taking place across a range of subdisciplines, representing not only signs of recognition by peers and of academic reputation, but also contributions to the 'common good'). This also applies to ad-hoc reviewing for conferences and journals in which our researchers are commonly involved.

1.4 Assessment

For the 2017 QANU review, a new evaluation protocol applied, which has been developed in recent years. It has a different scoring system on partly different (and less) criteria, and with an assessment taking place for the research institute as a whole, not separate programmes anymore. This means that we have also stopped reporting on individual programmes that used to mirror academic sections. The move towards an institute-level approach makes sense; we have always seen research programmes as a primarily pragmatic tool to collect, evaluate and present research. Links between researchers from different programmes/sections on specific interdisciplinary themes have existed within ABS, blurring the boundaries between 'subdisciplinary' programmes; this also applied, e.g., to our corporate governance research priority area which incorporates researchers from multiple sections. Moreover, the ongoing growth of ABS necessitated splitting up growing sections (see Table 1), but not necessarily starting new full research programmes for each new section. An institute-level approach also supersedes concerns raised about viability in relation to the exploration of a potential split as happened in the case of ISM and E&I, and negatively affected the ISM score on this criterion in the 2014 assessment. Table 6 shows that ABS research has come on par with other high-quality institutions in The Netherlands. In 2021 a new National Research Assessment is expected.

Table 6 Results of external (QANU) research assessments over the years

Section/research programme	Year of report (period covered)	Scores on the various aspects*			
		Quality	Productivity	Relevance	Viability
Accounting	2002 (1996-2000)	3	3	4	3
	2009 (2001-2007)	3.5	4	4	4
	2014 (2008-2012)	**4**	**4**	**4**	**3.5**
Finance**	2002 (1996-2000)	5	4	4	4
	2009 (2001-2007)	**5**	**4.5**	**5**	**4**
HRM / Organisational Behaviour	**2014 (2008-2012)**	**4**	**4.5**	**4**	**4**
International Strategy & Marketing	**2014 (2008-2012)**	**4.5**	**4**	**5**	**3.5**

Note: Most recent results are printed in bold. * Meaning of scores: 5 = excellent; 4 = very good; 3 = good; 2 = satisfactory; 1 = unsatisfactory. ** The Finance programme was not part of the 2013 interim-assessment as this was tied to a business research master programme application for the non-finance subdisciplines. HRM/OB was renamed to Leaderschip & Management in 2016.

University/school	year of report (period covered)	Scores on the various aspects		
		Quality	Societal Relevance	Viability
EUR Erasmus School of Economics	2016 (2008-2014)	Very good	Good	Very good
MU, School of Business and Economics	2016 (2008-2014)	Very good	Very good	Very good
RUG, RI of the Faculty of Economics and Business	2016 (2008-2014)	Very good	Excellent	Very good
UU, Utrecht School of Economics	2016 (2008-2014)	Very good	Very good	Good
UvA, ABS	**2016 (2008-2014)**	**Very good**	**Very good**	**Very good**
UvA, ASE	2016 (2008-2014)	Very good	Very good	Very good
VU, Faculty of Economics and Business Administration	2016 (2008-2014)	Very good	Very good	Excellent

Note: the most recent assessment was done at the level of the institute and had four categories in terms of scores: excellent/world leading; very good; good; unsatisfactory.

An institute-level assessment was given by the EFMD European Quality Improvement System (EQUIS). We quote from its 2017 peer review report (presentation to the EQUIS Accreditation Board June 6, 2017), which noted as some of the areas of excellence:

Research is a particular strength of the School. It enables the School to have developed a profile in business data analytics, quantitative management, and macro finance.

The research excellence also contributes to deliver rigorous research-based teaching in its programmes. Programme delivery is a particular strength of the School, especially at the Master level given the small class sizes and the approachability of its faculty by students.

The PRT commends the School on this successful hiring strategy and was impressed with the quality of the faculty members and their dedication to research.
The PRT's view is that the research quality is strong and will very likely continue to remain so given the faculty, the systems, and the School's emphasis on research. Given other constraints for hiring good people such as the salary constraints, research strength is key to being competitive on the market for students and faculty. The School does a very good job in this dimension.
The PRT rated the *positioning of research within the school*, the *research output*, and the *impact of research* as above standard.

The PRT's view is that the research quality is excellent and will continue to remain on that level given the faculty, the openness to research as an institution, and the focus on research output for all faculty. The PRT sees great value in the data science expertise that is continuously being built up and that can leverage across UvA faculties such that the School could be a university-wide anchor point for research and teaching in such a priority area. This view was also put forward by the Rector of UvA who underlined the importance of the School in this distinctive topic within the University.

In the official ratification letter of the AACSB accreditation of UvA Economics & Business in March 2016, as the first of three points indicating the strengths of the schools, the research capabilities were mentioned: "research outputs of some faculty are of world-class quality. This includes regular publications in elite journals, presentations at international meetings and influential input in public debates".

Robin Döttling	Assistant professor	RSM
Eloisa Federici	Resarch & Advice	ING
Pascal Golec	Data scientist	ABN AMRO
Dorinth van Dijk	Economist	DNB
Rob Sperna Weiland	Capital Modelling Expert	Rabobank Groep
Qingchen Wang	Assistant professor	University of Hong Kong
Helena Kloosterman	-	-
Binqi Tang	Assistant professor	Nanjing University
2018 graduates	**Position (2019, June)**	**Organisation**
Robert Kleinknecht	Editor	ESB (journal)
Liang Zhao	Postdoc	University of Agder
Joris Demmers	Lecturer	Monash University
Daniel van den Buuse	Lecturer	HvA University of Applied Sciences
Renske van Geffen	Lecturer	HvA University of Applied Sciences
Rob Goedhart	Assistant professor	University of Amsterdam
Ieva Sakalauskaite	Economist	Bank of England
2017 graduates	**Position (2018, July)**	**Organisation**
Stephanie Chan	Assistant professor	Xiamen University
Conor Clune	Lecturer	University of South Wales
Mark Dijkstra	Assistant professor	Utrecht University
Anouar El Haji	CEO & Founder	Veylinx
Bart Lameijer	Senior Consultant CFO Services	Deloitte
Rebecca Maughan	Assistant professor	University College Dublin
Mario Schabus	Senior Lecturer	University of Melbourne
Guilherme Vala Elias Pimentel de Oliviera	Postdoctoral researcher	Columbia Law School
Inge Wolsink	Postdoctoral researcher	University of Amsterdam
2016 graduates	**Position (2018, July)**	**Organisation**
Thomas Akkerhuis	Assistant professor	University of Amsterdam
Francesca Ciulli	Postdoctoral researcher	University of Amsterdam
David Goodwin	Retired	n.a.
Timotej Homar	Supervision analyst	European Central Bank
Monika Kackovic	Assistant professor	University of Amsterdam
Alex Kuiper	Assistant professor	University of Amsterdam
François Lenfant	Independent researcher	Lenfant Research
Zhe Sun	Assistant professor	Jilin University
Inez Zwetsloot	Assistant professor	City University of Hong Kong

Table 9 Graduations by cohort

Cohort	Name	Start	Graduation	Current employer/base (July 2020)	Graduated	Working in academia/ research position
2011	Kuijken, B.	1/02/11	8/12/15	University of Amsterdam	80%	60%
	Stofberg, N.	1/09/11		University of Amsterdam

	Wang	1/09/15	14/06/19	University of Hong Kong		
	Jiang	1/09/15		University of Amsterdam		
	Goedhart	1/01/15	17/10/18	University of Amsterdam		

In 2019 ABS released its protocol for research data management. The protocol was subsequently slightly amended and adopted by the Faculty Board after a review by the Works Council, and came into into official effect on 1 March 2020. In line with UvA guidelines, all researchers are expected to adhere to the protocol. This document includes information on your research data management plan, what data is collected, how it is collected, and how your data is stored. It can be found here: https://abs.uva.nl/research/research-policy/research-policy.html

Table 10 below provides some numeric information on RDM in 2019.
