EXECUTIVE SUMMARY

This report contains the main scientific output of the Amsterdam Business School (ABS) for the year 2023, as well as forthcoming refereed articles 2024 (as collected in December 2023-March 2024). This information, included in the list of output, is preceded by key tables on input and output in these same years. Most tables and figures will speak for themselves and where no further explanation is required, none is given. Overall, the growth of faculty has stabilized in 2023. Growth in preceding years has also clearly influenced our research output with a steep increase in top publications. We continue to invest in PhD students: many new PhD projects have started within the Outside-in scheme, aligning our research with the UN sustainable development goals and on the new incentive grants.

Further details about the institute, our researchers and activities are available on our website.

The information below was retrieved March 14, 2024.

Quotes from the EQUIS Peer Review Team 2024 report and BSIS 2024 report

The School is now investing heavily in the impact of its research on Business and Society and has recently undertaken the EFMD BSIS assessment. The School has 5 'outside-in' research priorities related to the UN sustainable development goals (underpinned by its USPs in analytics and sustainability), and to extend the impact of these, is investing in a number of impact centres, supported with recruitment of relevant faculty, postdocs and PhD students. The PRT encourages the School to take this investment forward and to embed impact in assessment of faculty for tenure and promotion in a way that maintains a balance between excellent original research and the development of research into societal benefit. (p6).

As commented above, research is part of the DNA of UvA EB, feeding into programmes and the 3RI approach, and more recently linking into inter-disciplinary impact themes, as the School seeks to invest in and deliver stronger impact for business and society from its research. The PRT commends the School for its research strength, and that it is supporting this with the faculty recruitment, performance management and assessment systems. And indeed, it is this depth of excellence in research along with the roles the School's senior faculty hold in, for example, leading international journals, as well as Amsterdam as a city that attracts the many international faculty UvA EB now employs. The QS rankings reflect the research strength of the School and must be influenced by an international reputation given the role of academic referees in the rankings (EQUIS PRT report March 2024, p 17-18)

• UvA EB has an impressive track record of publications in leading international journals and highly structured research policy;
• UvA EB has a significant number of nationally and internationally recognized faculty;
• UvA EB is known for its award winning research on big global challenges relating to SDGs provide visible intellectual impact e.g. optimal location of hospitals in Timor Lest, Covid Test Centres in Nepal and Stroke provision in Vietnam, plastic removal from oceans, etc.

BSIS conclusions and recommendations, February 2024

Most recent national research assessment evaluation

As part of the regular six-year assessment cycle for research, seven faculties of economics and business of Dutch universities were assessed again in a joint effort by an international committee in September 2021. This assessment included Economics and Business (EB) at UvA. The committee received a self-assessment report from each of the units (for EB this included both ABS and ASE) and was asked to assess all units based on the Strategy Evaluation Protocol 2021- 2027 (SEP). The main assessment criteria were: quality of research, relevance to society, and viability. Due to Covid the meetings took place online. The main area's for improvement were identified as:

1) enhancing inter- and intrafaculty collaboration
2) increase research quality and recognition
3) address HR issues such as retention and diversity and
4) increase societal relevance/valorisation.

A summary of the review, as taken from the faculty reaction to the UvA board is given here.

Despite the drawbacks of not being able to meet in person, we believe they have been able to get a clear and encompassing view of the most important challenges facing our faculty. We are pleased to see that the committee has noticed that at our faculty 'research quality is clearly a top priority' (p. 39) and that research quality and output have kept improving in the period under review. We also take great pride from the praise of our approach to mainly use the international job market for recruiting (p. 41). Although improvements are always possible and ongoing, the committee finds that many basic support systems are in place (e.g. for grant support, valorization) and it also believes both schools "are very strong in their capacity to train and prepare future academic and industry personnel" (p. 45). Furthermore, the committee also states that in principle "both schools and faculty have an understanding of what can and must be done better and thus has confidence in a bright future for both schools" (p. 44).

Suggestions for improvement were welcomed and have been and will be discussed in board meetings.

SECTION 4 - RESEARCH DATA MANAGEMENT

In 2019 ABS released its protocol for research data management. The protocol was subsequently slightly amended and adopted by the Faculty Board after a review by the Works Council and came into official effect on 1 March 2020. In line with UvA guidelines, all researchers are expected to adhere to the protocol. This document includes information on research data management plan, what data is collected, how it is collected, and how data is stored. It can be found here: https://abs.uva.nl/research/research-policy/research-policy.html In 2022 the system/website that was internally develop to handle request for ethical review (EBEC web form), and from 2019 onwards also included RDM and privacy questions, was replaced by a university wide tool called RMS (research management services).

In 2023 the RMS system became fully operational

Volberda, H.W. (2023). Partner *World Economic Forum* (coordinator Klaus Schwab) The Future of Growth Report, The Future of Jobs Report, the Global Risk Report and the Global Gender Gap Report, produced in cooperation with world class academics and a global network of research institutes, provides a comprehensive dataset on growth, innovation, equality and competitiveness, both in terms of geographical coverage (143 developed and developing countries) and indicators displayed (over a hundred variables on country performance).

Volberda, H.W. (et al.) (2023). *Reports World Economic Forum*: Future of Growth Report, Future of Jobs Report, Global Risk Report, Global Gender Gap Report

The renowned World Economic Forum (WEF) publishes several reports each year based on data of over 140 countries worldwide. The WEF is committed to improving the state of the world. They intend to do this by engaging world leaders in fields of business, politics, academics and other leaders of society to shape agendas on global, regional and industry level. The Amsterdam Centre for Business Innovation (ACBI) is the partner-institute for the Netherlands and plays a vital role in gathering the data needed for the Netherlands. By contributing to the data collection for the World Economic Forum, ACBI is allowed to publish the rankings of the Netherlands and use the data for further research. In doing this ACBI receives a lot of media attention for the activities and the competitive position of the Netherlands.

Volberda, H.W. (et al.) (2023). *The Dutch Innovation Award 2023.* The Dutch Innovation Monitor has examined to what extent companies are being innovative and which elements are of pivotal importance in securing success. On the basis of company data obtained through the Innovation Monitor, three companies were nominated for the Dutch Innovation Award 2023. The Nominees and winner were presented in a live show broadcasted by AVROTROS on primetime on Dutch TV.
