EXECUTIVE SUMMARY

This report contains the main scientific output of the Amsterdam Business School (ABS) for the year 2020, as well as forthcoming refereed articles 2021 (as collected in December 2019-February 2020). This information, included in the list of output, is preceded by key tables on input and output in these same years.

Further details about the institute, our researchers and activities is available on our website (see http://abs.uva.nl/research; https://abs.uva.nl/sections-and-faculty/sections-and-faculty.html).

</table>
The stated ambition “quality over quantity”, giving priority to top-publications, is consistent with the perceived position. The research productivity is strongly incentivised through the faculty workload management system, allocating research time based on past realised productivity in terms of published papers. The faculty counts among its ranks a number of well cited and internationally influential researchers, in both economics and management. Overall, the PRT salutes the continued excellence pursued by the researchers in the School, a mark of distinction well integrated in a large successful international research university. Drawing on the solid basis in quantitative analysis and social sciences, the focus shift to societal impact and digital transformation has the potential of both increasing impact and unleashing new methodological advances.

EQUIS PEER REVIEW TEAM REPORT February 2021

The research strategy is mainly determined by two very strong research institutes: Amsterdam School of Business Research Institute (ABS-R1) and … The research strategy has also a clear focus on high-quality publications with a focus in specific research areas (… Corporate Governance for ABS; Risk and Macro-Finance at FEB-level).

UvA-FEB also seems to be well-embedded in its societal context. Several professors are very visible in the public debate on (business) economics issues. To increase its interaction with practitioners and government UvA-FEB did set up in 2016 the
“Co-creation Series”, which helps faculty in the operationalization and valorization activities. Within the Co-creation Series, academics, practitioners and governmental agencies meet in both formal and informal sessions to discuss specific challenges they face, share best-practices or frameworks, and present research findings.

Research conducted on entrepreneurship and innovation within ABS also finds its way to entrepreneurs and start-up companies through the Amsterdam Centre of Entrepreneurship (ACE). ABS is also a partner of the Amsterdam Academic Alliance-sponsored Amsterdam Data Science initiative, which develops world-class data science talent and technology within the Amsterdam region. UvA-FEB has also received in the recent years a large number of company-sponsored PhD-projects in data science.

SECTION 4 - RESEARCH DATA MANAGEMENT

In 2019 ABS released its protocol for research data management. The protocol was subsequently slightly amended and adopted by the Faculty Board after a review by the Works Council, and came into into official effect on 1 March 2020. In line with UvA guidelines, all researchers are expected to adhere to the protocol. This document includes information on your research data management plan, what data is collected, how it is collected, and how your data is stored. It can be found here: https://abs.uva.nl/research/research-policy/research-policy.html

Although only one data set from one of the 2020 academic publications had been put in Figshare in March 2021, most have now been stored after a reminder by the Research Institute.
