EXECUTIVE SUMMARY

This report contains the main scientific output of the Amsterdam Business School (ABS) for the year 2025, as well as forthcoming refereed articles 2026 (as collected in December 2025-March 2026). This information, included in the list of output, is preceded by key tables on input and output in these same years. Most tables and figures will speak for themselves and where no further explanation is required, none is given. Overall, the growth of faculty has stabilized since 2023. Growth in preceding years has also clearly influenced our research output with a steep increase in top publications, which now also seems to be stabilizing. We continue to invest in PhD students: many new PhD projects have started within the Outside-in scheme, aligning our research with the UN sustainable development goals and on the new incentive grants, but also in this regard numbers have stabilized and declined in 2025 and given the economic uncertainty we foresee a decline in the number of starting PhD students for the coming years.

Further details about the institute, our researchers and activities are available on our [website](#).

Table of contents

<i>Section 1 – Input</i>	4
Table 1 – Faculty per section	4
Figure 1 – Faculty growth	4
Table 2 – Faculty by rank, gender, age & nationality, flow of funding	5

Figure 4 – Information of Altmetric Rankings

The information below was retrieved January 2026.

Quotes from the EQUIS Peer Review Team 2024 report and BSIS 2024 report

The School is now investing heavily in the impact of its research on Business and Society and has recently undertaken the EFMD BSIS assessment. The School has 5 'outside-in' research priorities related to the UN sustainable development goals (underpinned by its USPs in analytics and sustainability), and to extend the impact of these, is investing in a number of impact centres, supported with recruitment of relevant faculty, postdocs and PhD students. The PRT encourages the School to take this investment forward and to embed impact in

assessment of faculty for tenure and promotion in a way that maintains a balance between excellent original research and the development of research into societal benefit. (p6).

As commented above, research is part of the DNA of UvA EB, feeding into programmes and the 3RI approach, and more recently linking into interdisciplinary impact themes, as the School seeks to invest in and deliver stronger impact for business and society from its research. The PRT commends the School for its research strength, and that it is supporting this with the faculty recruitment, performance management and assessment systems. And indeed, it is this depth of excellence in research along with the roles the School's senior faculty hold in, for example, leading international journals, as well as Amsterdam as a city that attracts the many international faculty UvA EB now employs. The QS rankings reflect the research strength of the School and must be influenced by an international reputation given the role of academic referees in the rankings (EQUIS PRT report February 2024, p 17-18)

- UvA EB has an impressive track record of publications in leading international journals and highly structured research policy;
- UvA EB has a significant number of nationally and internationally recognized faculty;
- UvA EB is known for its award winning research on big global challenges relating to SDGs provide visible intellectual impact e.g. optimal location of hospitals in Timor Lest, Covid Test Centres in Nepal and Stroke provision in Vietnam, plastic removal from oceans, etc.

BISIS conclusions and recommendations, February 2024

The three most important recommendations regarding research were:

- 1) Look at gender balance at associate and full professor level
- 2) Embed impact in both recruiting efforts and assessment of faculty for tenure and promotion in a way that maintains a balance between excellent original research and the development of research into societal benefit.
- 3) Focus on diversifying income through second and third stream funding.

Most recent national research assessment evaluation

As part of the regular six-year assessment cycle for research, seven faculties of economics and business of Dutch universities were assessed again in a joint effort by an international committee in September 2021. This assessment included Economics and Business (EB) at UvA. The committee received a self-assessment report from each of the units (for EB this included both ABS and ASE) and was asked to assess all units based on the Strategy Evaluation Protocol 2021- 2027 (SEP). The main assessment criteria were: quality of research, relevance to society, and viability. Due to Covid the meetings took place online. The main areas for improvement were identified as:

- 1) enhancing inter- and intrafaculty collaboration
- 2) increase research quality and recognition
- 3) address HR issues such as retention and diversity and
- 4) increase societal relevance/valorisation.

A summary of the review, as taken from the faculty reaction to the UvA board is given here.

Despite the drawbacks of not being able to meet in person, we believe they have been able to get a clear and encompassing view of the most important challenges facing our faculty. We are pleased to see that the committee has noticed that at our faculty 'research quality is clearly a top priority' (p. 39) and that research quality and output have kept improving in the period under review. We also take great pride from the praise of our approach to mainly use the international job market for recruiting (p. 41). Although improvements are always possible and ongoing, the committee finds that many basic support systems are in place (e.g. for grant support, valorization) and it also believes both schools "are very strong in their capacity to train and prepare future academic and industry personnel" (p. 45). Furthermore, the committee also states that in principle "both schools and faculty have an understanding of what can and must be done better and thus has confidence in a bright future for both schools" (p. 44).

Suggestions for improvement were welcomed and have been and will be discussed in board meetings.

SECTION 4 - RESEARCH DATA MANAGEMENT

In 2019 ABS released its protocol for research data management. The protocol was subsequently slightly amended and adopted by the Faculty Board after a review by the Works Council and came into official effect on 1 March 2020. In line with UvA guidelines, all researchers are expected to adhere to the protocol. This document includes information on research data management plan, what data is collected, how it is collected, and how data is stored. It can be found here: <https://abs.uva.nl/research/research-policy/research-policy.html> In 2022 the system/website that was internally develop to handle request for ethical review (EBEC web form), and from 2019 onwards also included RDM and privacy questions, was replaced by a university wide tool called RMS (research management services).

In 2023 the RMS system became fully operational

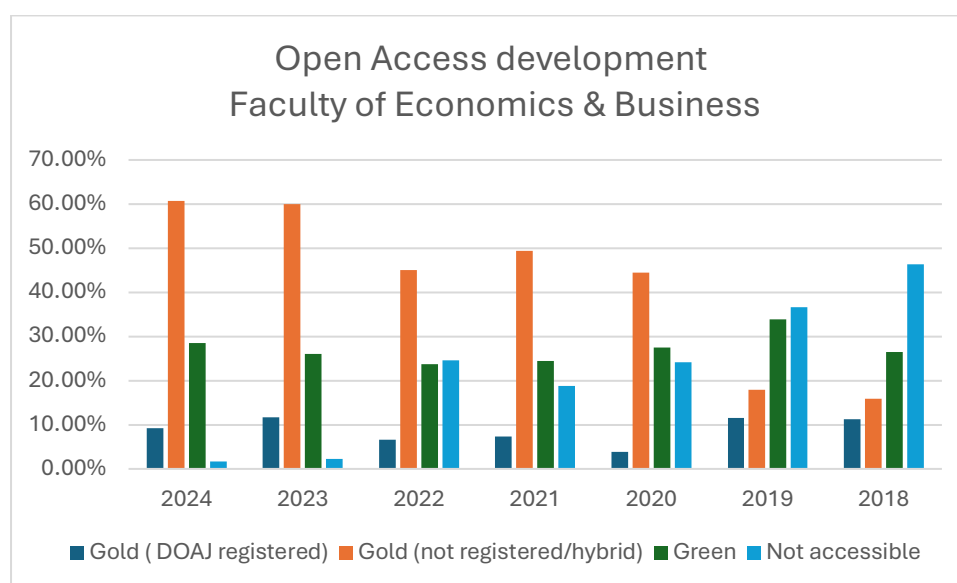

Table set 12 – Figshare use

Figshare ABS	202	Of which based on data	Of which data (partially) in Figshare	Of which data available elsewhere	Of which No data in Figshare/el.	2025 Dissertations	Of which data put in Figshare
	116	86	30	14	42	13	13

Source: Figshare, retrieved by data steward Thomas Gales February 2026

RMS projects E&B				
Date	6/29/25			
	2022	2023	2024	2025
Total research projects in RMS	58	125	137	98

Figure 5 – Open access publications

Source: UvA University Library, Open Access figures, June 2025

Output related to the five Outside-in themes is highlighted in the following manner

Responsible Digital transformations

Sustainability & Environmental Economics

Resilient society & financial stability

Nudging for a better world

Welfare & Healthcare
